

Testimonials

My name is Renee Putter and I am the Athletic Director for the Carrollton-Farmers Branch Independent School District in Carrollton, Texas. A few years back, we purchased a SPORT-O-ZONE machine, and then a second one a year later. This has been the best purchase ever!

We place all kind of sport equipment in the machine and it comes out bacteria free. We have had our share of Staph Infections and this machine has assisted us in cutting down the number of bacteria related cases in our middle and high schools' athletic programs.

After the game and at the end of the season, our football coaches place their helmets and shoulder pads in the machine and the machine disinfects them in a quick amount of time. The coaches know that after each treatment, the equipment is bacteria free. Parents love the idea that we are being proactive in our fight against bacterial infections, especially MRSA.

This is a great product for CFBISD.

Renee Putter

Athletic Director

Carrollton-Farmers Branch ISD

I would like to thank you and your company for introducing me to your Sports-O- Zone Sanitizing Machine. It is a wonderful machine that does everything you said it would. In this age of infections such as Staph and MRSA this product is the best method of prevention that I have found. It is our job as Athletic Trainers to not only treat and monitor the athletes but also to be a prevention advocate and the Sports-O-Zone Sanitizer is by far the best prevention tool to eradicate pathogens as well as prevent exposure and the spread of infections.

We have not only used the Sports-O-Zone Sanitizer to sanitize our athletic gear such as helmets, shoulder pads, thigh and knee pads, wrestling head gear, and volleyball pads, but we have also started a program to regularly sanitize our science safety goggles, language head phones, and various items from our nurses clinic. We are extending the use to our Jr. High and organizing a schedule to allow their athletic equipment to be sanitized as well. I am sure that as we progress we will find many uses for the Ozone Sanitizer to help combat disease in our school.

I wish every school could have the access to a Sports-O-Zone Sanitizer. It is an excellent tool in the ongoing fight against the spread of disease.

Jim Routhier LAT, ATC.

Athletic Trainer

Concord High School

The whole problem with MRSA is still out there. It's not going to go away magically. Since using the Sports-O-Zone Sanitizing System, we have seen reduction in influenza and strep throat. We can't just rely on students to disinfect their own equipment and do it properly.

Bernie Stento, MS, LAT, ATC
Certified Athletic Trainer
Chesterton High School

The Sports-O-Zone sanitizing unit performed to our expectations and gave us the confidence that this unit contributes to our risk management control of organisms. Our job is to keep our players healthy and on the playing field which makes the Sports-O-Zone sanitizing unit a valuable asset for the 49ers.

Steve Urbaniak, Equipment Manager
San Francisco 49ers

"We could get our whole team done in four or five cycles (using the Sports-O-Zone Sanitizing System), once a week or every two weeks. It doesn't matter how hot your water is, without a machine like that, you're probably not getting everything and anything. It takes it one step further and some peace of mind."

Brad Fotty, Winnipeg Blue Bombers Equipment Manager
