Email/Testimonial from Josh, an Orlando league hockey player:

Scott,

I've played two games on the equipment and it's great. The "hockey" smell is absolutely reduced. I pull my hand out of my glove to scratch my face, and i can still smell that fresh clean smell. Also, I noticed the spots of mold are gone on the elbow pads. The itching around my hairline has stopped since the cleaning. Very cool... I'm impressed. How often do you recommend a cleaning like this?

Could you please give me info/flyers to give to my teammates? I will handout stuff in the locker room.

Thank you! Hope all is well!

Josh

"I'm shocked by the number of kids I hear about whose hockey bags are never opened (after the gear is used). I had one brought to me that was just rancid. After the treatment (with the Sports-O-Zone Sanitizing System), the smell was gone.... It's going to get rid of the bacteria for a time. Will it come back? Certainly, as soon as it builds up sweat in it again. But if you look after it and maintain it, you'll get more life out of the equipment and you're going to reduce an athlete's exposure to certain things (MRSA, Staph, etc.)."

Steve Dech, owner of a Sports-O-Zone Sanitizing System, excerpt Winnipeg Free Press, April 9, 2008
