

Sports-O-Zone

One-Step Bacterial & Odor Control

WHY SPORTS-O-ZONE

Sports-O-Zone is the only completely mobile solution that tackles the tough task of both deodorizing and sanitizing your equipment against harmful bacteria that can cause serious skin infections and, in some cases, death.

OZONE

The patented system uses ozone, a naturally occurring gas, to deodorize and sanitize equipment without aerosol sprays. Using ozone allows you to sanitize hard-to-reach places on your equipment, ensuring that you kill more than 99.9% of bacteria, viruses, and molds.

EASE-OF-USE

When the unit has done its job, your equipment is dry and ready to use — there's no need for post-cycle application of liquid agents. The Sports-O-Zone sanitizing process leaves your equipment with a fresh scent without any residue from foreign materials, metals, or oils.

SAFETY

The unit is adaptable and safety oriented. A lockout device is used to eliminate unauthorized use. You have peace of mind knowing your equipment is safe from harmful pathogens like staph and MRSA.
