

Protect the Protectors Keep Your Unit Healthy

DECON ZONE

Sanitize. Deodorize.

DECON ZONE is Great for:

- Armor
- Blankets
- Combative gear like HIGH GEAR, RedMan, etc.
- Sleeping bags
- Kevlar vests
- Medical equipment, stethoscopes, lab coats, knee braces, elbow braces, portable stretchers, back boards, etc.
- Mess kits
- Military, law enforcement and first responder equipment
- Riot gear
- Shoes
- Sports gear, boxing, MMA
- Training gear
- Water containers

Stay on Active Duty with Ozone:

- **Effective Sanitizer:** System unleashes ozone to remove viruses, bacteria, mold, & other biological pollutants to significantly reduce illnesses and infection
- **Prevent Common Infections:** Our system has been proven to kill over 99.99% E. coli, Staph, MRSA, VRE, RSV, IAV, Pseudomona, Candida, etc.
- **Keep Your Unit Healthy:** Law enforcement and military members are at higher risk of infection, but ozone disinfection can keep them healthy and ready to serve the community.
- **Lower Gear Replacement Costs:** Unlike liquid disinfectants, our dry ozone cycle doesn't damage your equipment or deteriorate protective materials, meaning your gear will last longer.
- **Remove Odor:** Your unit isn't as effective when they're uncomfortable. Decon Zone completely rids gear of odor and leaves it smelling fresh.
- **Fast Disinfection:** In just 32 minutes, gear is sanitized and safe to use.

"Houston's heat and humidity is a fertile breeding ground for bacteria and odor on our tactical equipment. Our SWAT teams have found the Decon Zone Sanitizing System to be the ideal weapon for keeping our officers safe from rashes and skin infections — and it has prolonged the life of our equipment. One of the best benefits is putting on fresh smelling equipment. The Decon Zone is a must in our equipment sanitation protocol." — T. Dupuy, Houston SWAT Team

Decon Zone Sanitizing System
Elkhart, Indiana
(574) 294-5797
www.deconzone.com
Also Available Through GSA.

Manufacturer	Decon Zone
Product Name/Model	4201A (AH)
Standard	Safety/Dryer

Entrapment Safety:	
Emergency Stop Switch inside unit	Yes
Breathable air space	Yes
Door opens to escape from within	Yes
Door locks from outside unit	No
Ozone Gas Safety:	
Ozone gas cannot be produced with door open	Yes
Cycle interruption - gas brought to OSHA regulatory limits before door is allowed to open	Yes
System locks door	Yes
Ozone sensor technology	Yes
Smart Technology - computer monitoring system	Yes
Monitoring Download of unit data	Yes
Password Safety	Yes
Maintenance Technology	
Warning lights let you know when maintenance is required	Yes
Meets the following standards	
CE and UL designation for Medical Equipment	Yes
ISO 14971 Medical Devices	Yes
Emerging Pathogen Technology	
Variable Processing to kill emerging pathogens	Yes
Manufactured in USA with 99.98% USA materials & labor	Yes
> 99.9% kill MRSA/Staph, VRE, E. coli, RSV, IAV, Pseudomona	Yes

Annual Maintenance cost	\$ 1,250.00
All personal protective gear (PPE) incl bomb suits & large gear	Yes
Electrical requirements, 110v outlet	Yes
Consumables Required	No
Warranty 5 years, exterior 10 years	Yes
Cycle Time Adjustable	Yes
Dimensions in inches (Hgt x Wide x Depth)	51 x 66 x 24
Unit Weight in pounds	350
Fits through standard door	Yes
Size of Industrial Casters in inches	4
Durability/mobility in tactical environment	Yes
Capacity Style (chest provides > capacity even w/ less cu.ft.)	Chest
Capacity per load - 40+ Helmets or 24 Vests or 200+ N95 masks	Yes
Ozone device - Corona Discharge (highest ozone output)	Yes
ECCN designation - EAR99 NLR	Yes
Export Schedule B # 8543709655	Yes
CCR Status	Active
